

SCREEN FABRIC DESCRIPTIONS & ITEM CODES

We do not recommend using metal screens, true pet screen or heavy solar screens. We do not recommend using metal screens because it does not have the elasticity that fabrics provide. We do not recommend the heavier screens because it makes it very difficult to snap the cap over. Mesh size refers to the number of openings per inch.

Example: Fiberglass #1814 has 18 openings across and 14 openings down per each square inch of screen fabric.

BetterVue® #1818: Made from fiberglass. Provides excellent visibility from the inside; improving the view without sacrificing strength and durability. Fabric thickness = 0.011"
